Subject: Release of New Version of SANUPS SOFTWARE

Thank you very much for your continuing support, and we hope for prosperous days ahead for all of you. With regard to the above-mentioned subject, we kindly ask that you read the following report.

Details

1. Introduction

We will release a new version of the SANUPS SOFTWARE.

	New version		Conventional product	
	Version	Model	Version	Model
Windows	3.1.0	PMS52A*	3.0.1	PMS50B*
Multi-OS version		PMS53A*		PMS51B *

“\*” mark indicates a string of one or more character.

2. Changes

The SANUPS SOFTWARE ships with Java for GUI. The conventional products have been shipped with Oracle's Java, but the latest version is no longer available unless users and Oracle enter into a paid support contract. Therefore, from the new version, Java is replaced with the AdoptOpenJDK in which updates are periodically provided without entering into a paid support contract. The GUI function does not change even if Java is replaced with AdoptOpenJDK.

With this replacement, the model numbers and the supported operating systems will be changed. For details on the model numbers and supported operating systems of new version, see Appendix 1 "Model Numbers and Supported Operating Systems."

For details on changes, see Appendix 2 "Program Revision History."

3. Sales release date for new version

Mid-March 2020

4. Providing of updates

Regarding the SANUPS SOFTWARE versions 3.0.0 and 3.0.1, we will provide updates for free on our website. By installing the free update, you can update to version 3.1.0.

After updating, the supported operating systems will conform to the supported operating systems of version 3.1.0.

5. Discontinuation of old versions and old products

Old versions and old products before SANUPS SOFTWARE version 3.0.0 will be discontinued at the end of September 2020.

(We will continue to sell the conventional SANUPS SOFTWARE version 3.0.1.)

SANUPS SOFTWARE discontinued models
